

What does experience actually know?

Every skill in this library ends with the mistakes that make smart people produce weak work. Collected, they read as one long answer — 2470 rules of professional judgment, from PRDs to postmortems, negotiations to eulogies.

Part I: the craft, in full — the production tier of an open library used across Claude, ChatGPT, Gemini, and Cursor. Part II: the Anti-Pattern Almanac.

Free forever in digital form. This one is for your desk.

THE PROFESSIONAL WORK HANDBOOK

The Professional Work Handbook

496 skills. 2470 rules.

The craft of professional work,
written to instruct AI —
readable as a book for humans.

2470

rules of professional judgment
